Two Canadian audiophile CDs

Styles

Is this ever a surprising disc! Violinist Marc Belanger worked up these string études for his music students, but they actually deserve to be put out on a gold audiophile disc! The more strings he adds, the better it gets.

Musique Guy St-Onge

St-Onge is the founder of the label, and here he plays some 30 instruments on an astonishing disc. He came up with 14 imaginary films, and then wrote music for them. It makes you wish you could go to your video club and rent the movies, but playing this imaginative disc is the next best thing.
